Mixed Reality Opportunity

Mixed Reality is a

blending of the physical and digital worlds

PHYSICAL WORLD

MIXED REALITY

DIGITAL WORLD

Mixed Reality is here and

Companies are creating a new reality for work

1 in 3

By 2021, at least one-third of enterprises will support multi-experience platforms, including augmented reality

[Gartner Strategic Technology Trends, 2020](#)

Collaborative Mixed Reality opportunities

Remote expertise

Train/learn together

Immersive meetups

In-situ information

Design together

Connect and create

While the opportunity is large, building collaborative Mixed Reality solutions is challenging

It is hard to bring high fidelity 3D models into Mixed Reality in the file formats customers have

Representing people in mixed reality with realism requires a lot of time and resources

It is hard to keep a hologram stable in a location across time and devices

Synchronizing actions and expressions in a geographically distributed session is complex

Microsoft Mesh reduces the complexity of building collaborative Mixed Reality solutions

Introduction to Microsoft Mesh

Microsoft Mesh

Here can be anywhere.

Feel presence

Experience together

Connect from anywhere

The Mesh Developer Platform

Avatars

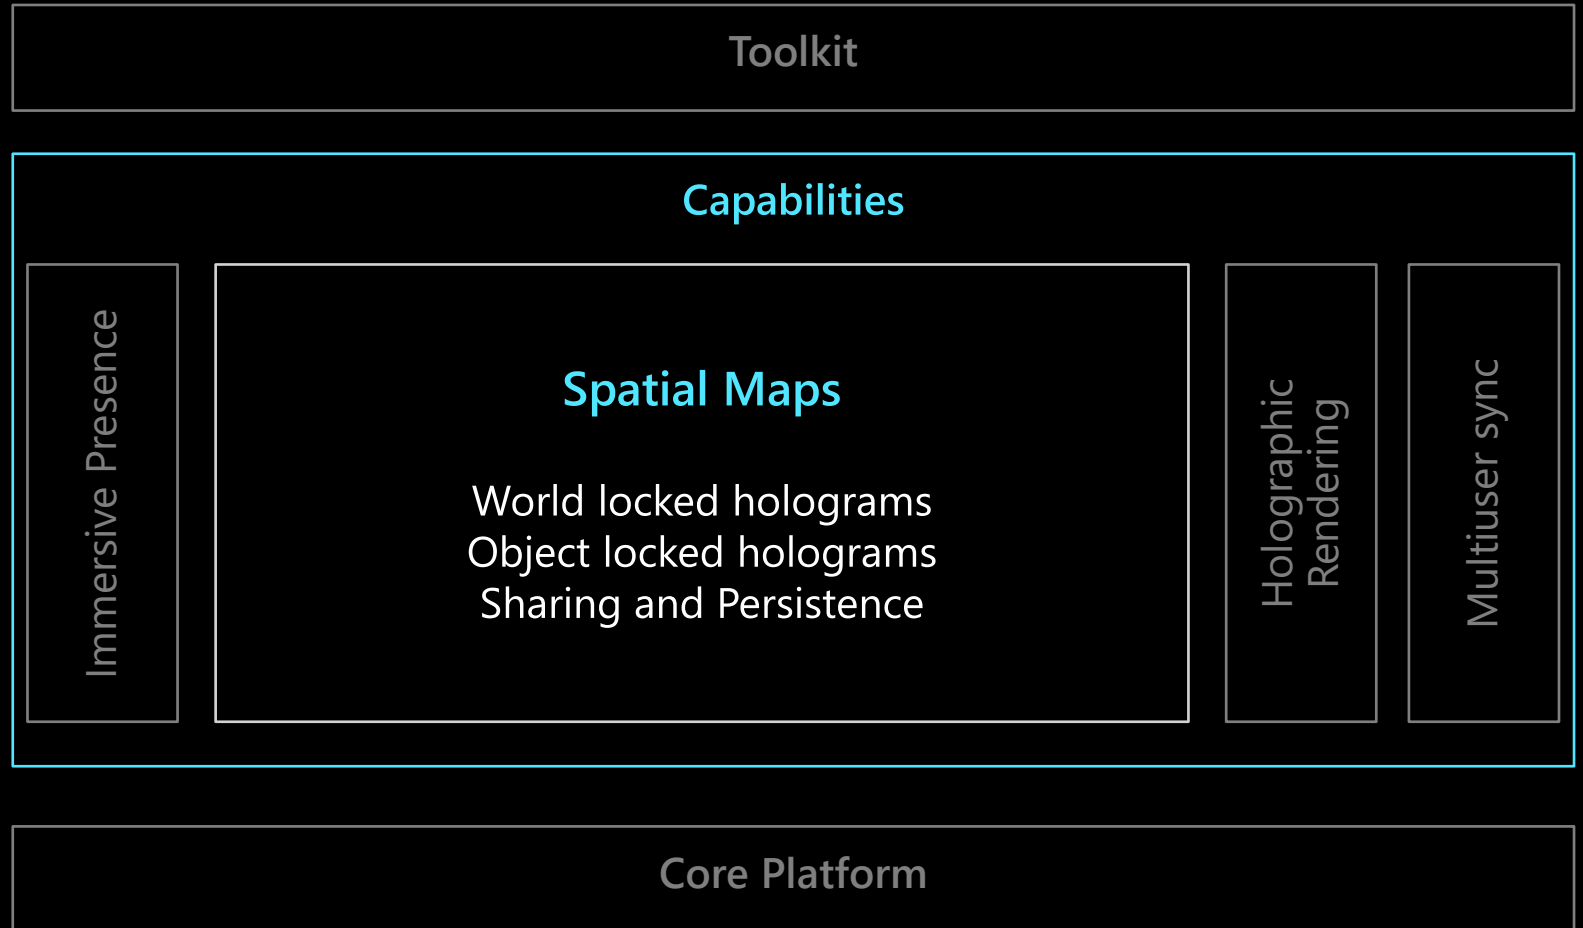

Authentically represent users in Mixed Reality with avatars that convey their motion and expression

Holoportation

Deliver 360 degree photorealistic holoportation when augmented with external sensors

The Mesh Developer Platform

Holographic Rendering

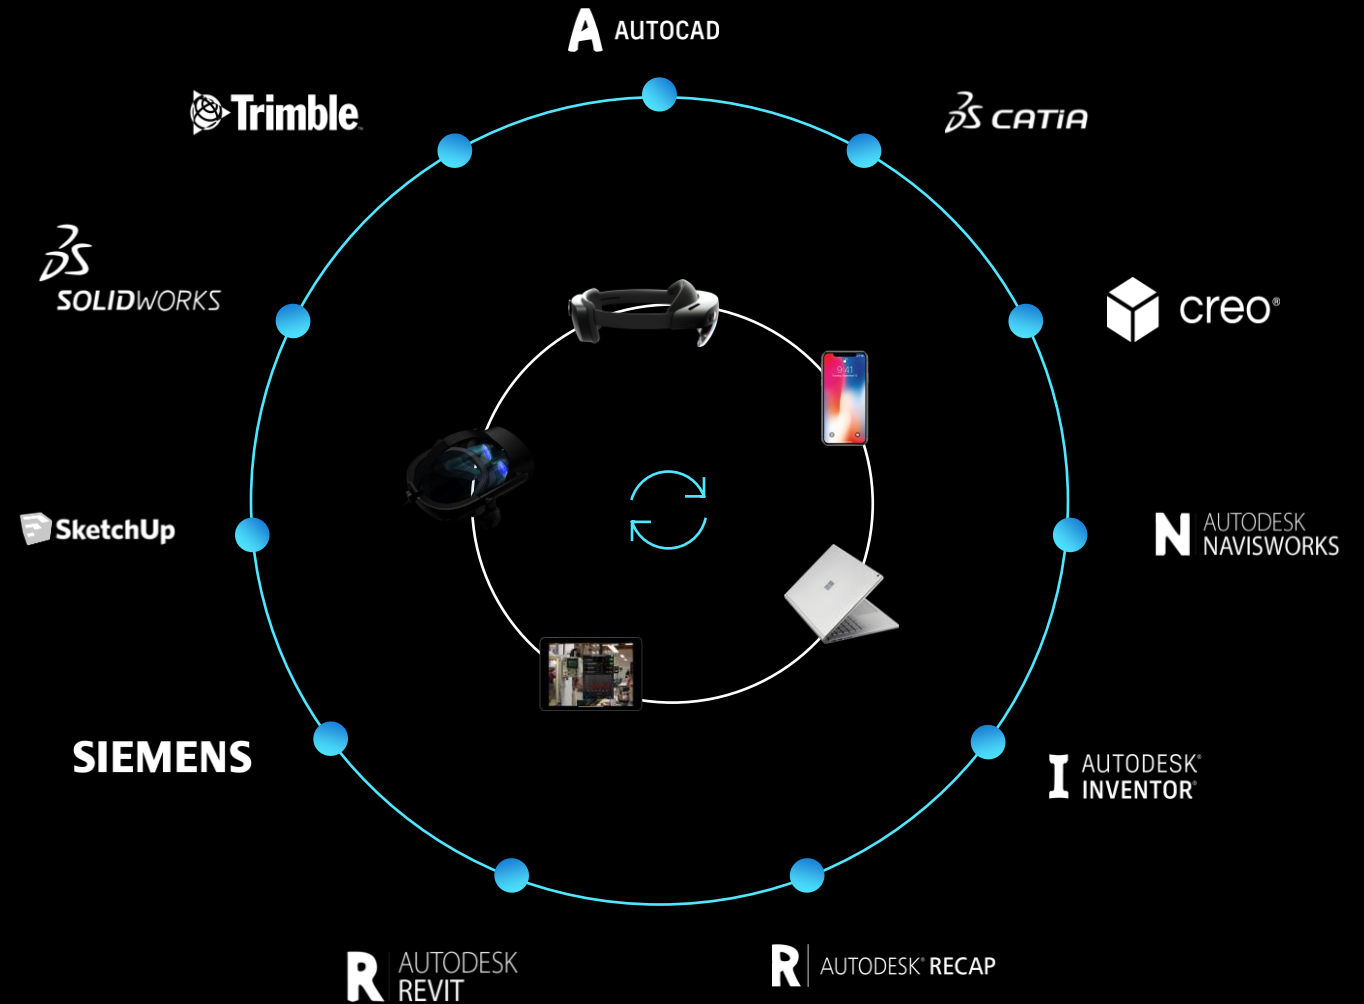

Holographic Rendering

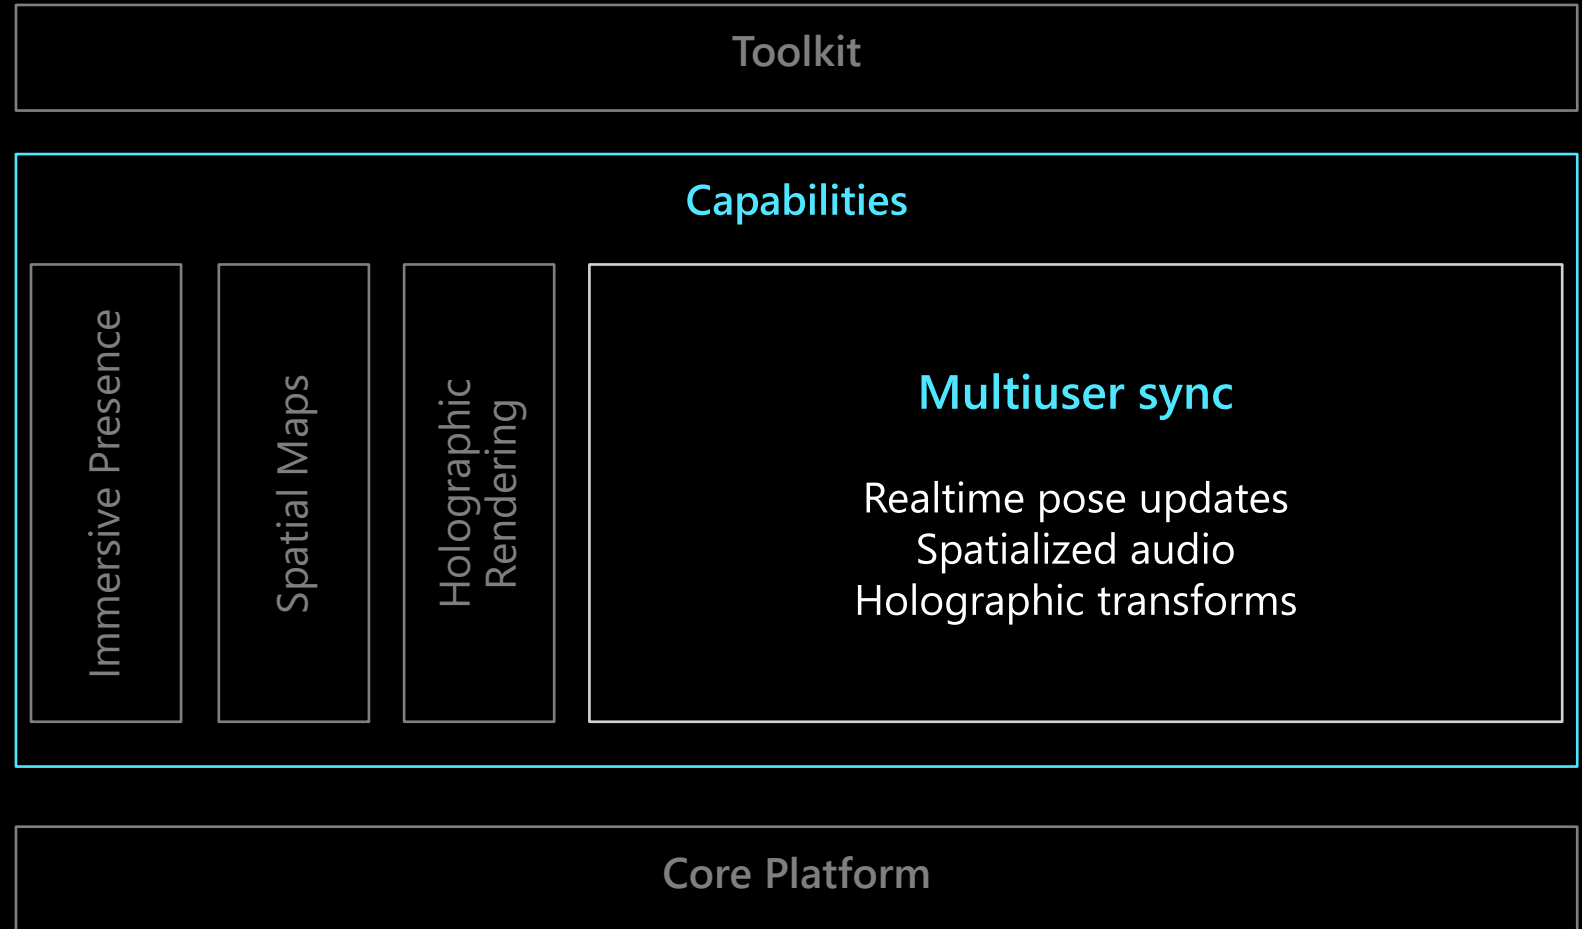

100k or 100M polygons, Mesh intelligently transcends from
local rendering to cloud powered rendering to deliver
uncompromised fidelity

Holographic Rendering

Mesh supports most 3D file formats to natively render in mesh enabled apps.

The Mesh Developer Platform

Real time pose updates

Multiuser sync

Synchronize the motion and expression of participants to deliver a sense of true engagement

Spatialized audio

Spatial audio enables apps that create a sense of being in the same physical space in multiuser scenarios

Holographic transformation

Synchronize holographic transformation across all participants
to easily deliver MMO apps
